

Choosing a phone level

Four levels to pick from — the difference is how many apps the phone may run.

Every phone is filtered the same way underneath. What you choose here is **how open the phone is**: whether it has an internet browser at all, and which kinds of apps it may run. You can move a phone up or down a level at any time.

On every phone, whatever level you pick

- **The filter is always on** and can't be switched off on the phone.
- **Explicit and immodest content is blocked everywhere** — in the browser and inside apps.
- **Safe search is forced**, and image search is turned off.
- **No VPN or workaround** can get around the filter.
- **The safe browser** (on every level that has one) blocks explicit and social-media sites, and hides pictures.

The four levels

1 Apps only

STRICTEST

APPS

- Only the approved, essential apps.

INTERNET BROWSER

- None — no web browsing at all.

2 Apps and safe browser

APPS

- The same approved apps as level 1.

INTERNET BROWSER

- The safe browser: filtered, pictures hidden, no explicit or social sites.

3 Open apps, no social media

APPS

- Almost any app
EXCEPT
social media, dating, other browsers and VPNs.
- A version that keeps YouTube is available on request.

INTERNET BROWSER

- The safe browser, same as level 2.

4 Open apps

MOST OPEN

APPS

- Almost any app,
INCLUDING SOCIAL MEDIA
- Still no explicit or dating apps, other browsers or VPNs.

INTERNET BROWSER

- The safe browser — at this level it keeps pictures.

The shiur lock

During shiur and seder, the phone limits itself to the essentials — phone, contacts, messages, WhatsApp, clock — and the browser shows *"the phone is locked right now, it's shiur time."* Everything comes back on its own when the window ends.

- Runs Sunday through Thursday, during the set learning windows.
- Can be turned off for bein hazmanim or a trip.
- A particular phone can be left out of it if needed.

Shachris 7:30–8:35

First seder 9:15–1:45

Second seder 3:35–7:15

Night seder 8:15–10:00

Pick the level that fits, and the shiur lock can be added on top of any of them. Levels can be changed at any time.
